

Food Safety Training Program

Corrective Action and Root Cause Analysis

Course Description

Corrective Action and root cause analysis are essential methodologies to address systemic problems and improve the effectiveness of procedures and management systems.

In the first part of the training class, participants will learn the common methodologies of root cause analysis and how to apply them during case studies and practical exercises.

The second part of the training class will focus on the implementation of an effective corrective action process, including methodologies and evaluation of effectiveness.

By the end of this training course, participants will be able to:

- Explain the objectives of root cause analysis as a procedure to find and evaluate the causes of problems
- Use problem cause data collection tools
- Apply root cause analysis tools
- Develop efficient corrective action plans

The participant will receive a certificate of successful completion for the course after passing a written knowledge test following the training course.

The course is designed for:

- Operations Staff in manufacturing and service organizations, managers, process owners and engineers.

Course length - 16 hrs

Corrective Action and Root Cause Analysis Course Description

Our Team

As part of a nationwide network of MEP centers in all 50 states linked together through the National Institute of Standards and Technology (NIST), NH MEP enables even the smallest firms in New Hampshire to have easy access to more than 1,400 manufacturing technical and business specialists, along with the latest technology and industry best practices.

ROI Impact

The New Hampshire MEP will assist your organization in a transformation from traditional to world-class manufacturer. Our experienced project managers will work with your team to identify conditions which may be impeding your ability to become more competitive and prosperous. We can assist in providing the resources to help you maximize your profit. In working side by side with your leadership, the MEP becomes a partner for success.

Integrally Involved

We provide affordable, innovative solutions to the problems encountered by today's manufacturing enterprise by facilitating interaction between industry, government and academia.

Included among our services are: Operational Excellence, Workforce Development, and Innovative Growth Solutions.

About the MEP Network

The New Hampshire Manufacturing Extension Partnership (NH MEP) is able to leverage a vast array of public and private resources and services that are available to every manufacturing enterprise in the state. The nationwide system of MEP centers is linked through the U.S. Department of Commerce - National Institute of Standards and Technology (NIST), with the common goal to strengthen the global competitiveness of U.S. manufacturers.
